

## Introduction of Lexia Reading and Accelerated Reading

Lexia Reading is a well-written, well structured technology/web enabled software system that provides guided practice of foundational reading skills. Critical skills are learned through repetition.

Students of all abilities can benefit from Lexia. The OESS has determined the technology based system will be used by students who are experiencing difficulty establishing and grasping important word accuracy skills in reading. Lexia provides additional practice but does not replace the teacher or small group instruction.

Accelerated reader is a computerized supplementary program that provides students with daily opportunities to read at their independent levels. Accountability of what is read is called for through quizzes that accompany each book that is read. Children plot their progress moving horizontally, then vertical through levels.

Independent reading experiences strengthens the overall reading experience. It builds fluency, comprehension and reading growth.
