

Dear Families:

A great new database called **PebbleGo Next** for students grades 3–6 is now available. PebbleGo Next can be accessed from school, home or on the go—anywhere your student has an internet connection.

PebbleGo Next specifically explores information related to the 50 states plus American Indian studies. Easy and inviting to navigate, students can discover what makes each state unique and learn about traditional and present-day American Indian life. Videos, maps, timelines, and even recipes are paired with the information-rich articles, increasing your student's interest and understanding.

Take a tour of PebbleGo Next and share your feedback. We hope that your family will enjoy both the learning opportunities and fun facts in this free-to-you (no ads!) web resource.
