Goals/Objectives for Student Accomplishment

Academic Student Competencies and Essential Skills

Clearly the key mission of our school system is to provide and emphasize strong, meaningful academic programs that lead to successful student achievement and acquisition of skills necessary for success.

We believe that all educated citizens must possess a core of basic or enabling skills and competencies that provide the critical intellectual foundations for broader acquisition of knowledge. These enabling skills, applied in diverse ways, form the heart of an academic experience as each contributes to the development of understanding within and among disciplines.

Academic Competencies and essential skills are identified in curriculum guides developed for each subject area. All curriculum guides are evaluated, revised and maintained by the district on an on-going basis to ensure alignment with the State of Connecticut Common Core of Learning.

Parents will be notified of the academic competencies and essential skills each time curriculum guides are revised.
