

## **Students**

### **Suicide Prevention and Intervention**

The Board of Education recognizes that suicide is a complex issue and that, while the school may recognize a potentially suicidal youth, it cannot make a clinical assessment of risk and provide indepth counseling. Instead, the Board directs school staff to refer students who may be at risk of attempting suicide to an appropriate service for professional assessment, counseling and treatment services outside of the school.

The Board of Education recognizes the need for youth suicide prevention procedures and will establish program(s) to identify risk factors for youth suicide, procedures to intervene with such youth, referral services and training for teachers, other school professionals and students to provide assistance in these programs.

Any school employee who may have knowledge of a suicide threat, attempt or ideation must take the proper steps to immediately report this information to the building Principal or his/her designee who will, in turn, notify the appropriate school officials, the Crisis Intervention Team, the student's family and appropriate resource services outside and within the school system.

Information concerning a student's suicide attempt, threat, or risk will only be shared with others to the degree necessary to protect that student and others.
