

Instruction

Organizational Plan

The Board of Education, dedicated to providing educational facilities and programs for children from pre-kindergarten through sixth grade, does not view any particular grade organization as intrinsically being best for defining schools. A broad and enriched curriculum shall be provided for all students.

The Board of Education shall, from time to time, determine the distribution of age and/or grade levels in individual school buildings. This determination shall be predicated on what best meets the needs of the children and what makes the most efficient use of available space, staff, and money.

Policy adopted: October 21, 2024
