### **Internet Acceptable Use: Filtering**

The Board of Education provides computers, computer systems, software, electronic access privileges, and networks for students and staff to carry out the mission of the Board in an environment which ensures access to up-to-date information, management, and communication services. Responsible use of these systems and networks is expected of all students and staff.

The computers, computer systems, software, electronic access privileges, and networks are the property of the Board of Education and are to be used only for those activities directly related to teaching, learning, and/or management by students and staff. The equipment, infrastructure, and software are not to be used for personal gain by any student or staff member.

In order to ensure that the District's Internet connection is used in the appropriate manner and that all users are protected from any inappropriate information published on the Internet, the District has and is continuing to implement the following:

1. Professional development and technology opportunities to help teachers integrate the use of the Internet into classroom teaching.
2. Use of the computers, computer systems, software electronic access privileges and networks shall be restricted to those users who have signed the District's "Acceptable Use Policy." The "Acceptable Use Policy" must also be signed by the student's parent or guardian.
3. Implementation of a system developed to filter out Internet sites with content/material considered inappropriate or harmful and unacceptable for student viewing. Such content includes that which is considered obscene, child pornography or harmful to minors. A committee of teachers, parents, and administrators shall be used to receive appeals from users who indicate that they have a specific need for using a filtered site.
4. All Internet access must be filtered, whether students or adults are using the computer system and regardless of the number of computers with Internet access provided by the school or library.

The Internet changes rapidly making it impossible to filter all objectionable sites. Therefore, the staff role in supervising and monitoring student access to the Internet is critical. In addition, each individual has the responsibility to monitor their own navigation on the Internet to avoid undesirable sites.

Filtering should only be viewed as one of a number of techniques used to manage student's access to the Internet and encourage acceptable usage. It should not be viewed as a foolproof approach to preventing access to material considered inappropriate or harmful to minors.

The placement of filters on District computers/computer systems is viewed as an exercise of the Board's ability to determine educational suitability of all material used in the schools.

## Instruction

### Internet Acceptable Use: Filtering (continued)

Filters will be utilized with District schools to (1) block pre-selected sites, (2) block by word, (3) block entire categories like chat and newsgroups, and (4) through a pre-selected list of approved sites.

The Superintendent of Schools is directed to establish guidelines and procedures for responsible use of computers, computer systems, software, electronic access privileges, and networks provided by the Board of Education.
