Testing Program

A plan of system-wide testing in addition to mandated Statewide assessments, shall be developed and implemented as one indication of the success and quality of the district's total educational program. In the case of individual students, standardized achievement tests, in combination with other criteria, can provide an indication of student achievement. When appropriate, students may also be tested for mental ability, aptitude, and interest.

The purposes of the district-wide testing program are to facilitate and provide information for the following:

1. ***Student Achievement*** - To produce information about relative student achievement so that parents/guardians, students, and teachers have a baseline against which to monitor academic progress. Within the limitations of group testing instruments, the information should be useful to serve as a validation device for other measures of student progress.
2. ***Student Counseling*** - To serve as a tool in the counseling and guidance of students for further direction and for specific academic placement.
3. ***Instructional Change*** - To provide data which will assist in the preparation of recommendations for instructional program changes to help:
 - a. Teachers with instructional decisions, plans and changes regarding classroom objectives and program implementation;
 - b. The professional staff formulate and recommend instructional policy; and
 - c. The Board of Education adopt instructional policies.
4. ***School and District Assessment*** - To provide additional indicators of the progress of the district toward established goals.

The testing program is an integral part of the district's needs assessment and evaluation programs. The program should be developed primarily for furnishing needed information to decision makers, including the Board, administrators, teachers, parents/guardians, and students.

The needs of these various groups shall be clearly identified, and the testing program shall be limited to obtaining that information which is needed and useful.

Testing Program (continued)

In planning, every effort will be made to see that testing contributes to the learning process rather than detracts from it. Efforts shall be made to incorporate necessary culture-free and culture-fair tests to assure reasonably accurate measurements.

The district shall not discriminate in the methods, practices, and materials used for testing, evaluating, and counseling students on the basis of sex, race, national origin, creed, sexual orientation or physical, mental, emotional, or learning disability. Discrimination complaints shall be processed in accordance with established procedures.

Parents shall be notified prior to any individual student testing, beyond that which is part of the regular classroom routine. Parental notification shall include the reason for the testing and an explanation of the test to be used. All such tests results shall be shared with parents.

Staff will receive in-service education in the use of designated tests, confidentiality issues, and in the interpretation of test results.

A periodic review and evaluation of the district's testing program will be conducted.

New Policy adopted:
